

Petroglyphs, the intriguing rock carvings found throughout the Nordic countries, date from the Bronze Age (1800 to 500 B.C.) The glyphs are pictures that tell a story, often marking important events and cultural information. Boats and rituals are frequent subjects.

Runes first appeared around 150 AD and were commonly used up through the late Medieval period. Each rune had a meaning, and as such they were used in ritual and divination probably long before they evolved into use as an alphabet. They were usually carved in wood and bone, written on animal skins, or carved in stone to memorialize deaths and events. Runes were an opportunity for wordplay and storytelling, a chance to express a sense of fun when writing.

The strikingly beautiful **Final Light at Sea** was painted by Minnesota/Nevada artist Floyd Johnson. The print's Deco process gives it the look and feel of an oil painting; no glass is needed. It's complemented well by a rustic, wood-like frame.

Framed Deco Print 17½ x 15½" 43956 \$85
Notecard 4½ x 6" 53480 \$3 each
