## IITTALA OF FINLAND

During the 1920s and '30s this innovative company in the small village of Iittala, Finland, became one of the frontrunners in the world of modern design. Artists Alvar and Aino Aalto were joined by Tapio Wirkkala, Timo Sarpaneva, Oiva Toikka and others in creating "the art of the everyday." The simple but beautiful designs that sprang from their imaginations were such an innovative combination of form, function and quality that they remain as appealing now as when they were first introduced.

We love Iittala's colors, the way each pattern's shapes and hues make it easy to mix and match in such creative ways. Rusts and blues predominate in this collection; check our website for all the delightful possibilities!
