Thursday, July 23 Arrive at Landvetter Airport Göteborg (Gothenburg), Sweden.
D After collecting our luggage and exchanging money for Swedish kronor, we’ll take the Flygbussarna (airport bus) into Goteborg. Stay at Hotel Eggers, the 3rd oldest hotel in Sweden still in operation. Dinner at the hotel.

Friday, July 24 Depart from Göteborg, Packhuskajen 10, at 10:00 on M/S Diana (1931)

Two seas, one river, three canals, eight lakes and 66 locks!

14.15-14.30	Lilla Edet	The lock at Lilla Edet, built in 1916, is the first on our journey. The original lock was opened in 1607 and was the first lock in Sweden.
15.45-16.30	Trollhättan, locks	The impressive lock staircase at Trollhättan consists of four locks, and has a total drop of 32 meters. Of the three parallel lock systems here, only the biggest one (from 1916) is still in use.

04.45	Dep. Vänersborg	
04.45-15.15	Lake Vänern	44 meters above sea level. Sweden’s largest lake and the third largest lake in Europe, after the Ladoga and Onega lakes in Russia.
09.30-11.45	Läckö Castle	The Castle was built in 1298 as a bishop’s residence. Its golden age was during the reign of Magnus Gabriel de la Gardie, who transformed it into a baroque castle in 1652. We are given a guided tour of the castle and the exhibitions (lots of stairs). Approx. 1 km walk.

15.15-17:20	Sjötorp	We now enter the first of the 58 narrow locks on the Göta Canal. At Sjötorp we have a set of eight locks and also the remains of some old shipyards. We visit the old warehouse, where you can find a shop selling, among other things, clothes and home décor, a café and the Sjötorp Canal Museum. In the museum you can see old pictures of Sjötorp, the interiors of several old ships, a large collection of ships' engines, etc. There is also a map of all the sunken ships in the Lake Vänern. It is also possible to take a walk along the locks.
19.40-21.25	Godhögen-Hajstorp övre	We pass a lock system consisting of four locks in very beautiful surroundings. In 1822 the western section of the Göta Canal was inaugurated at Hajstorp.

06.00	Dep. Hajstorp	
07.00	Töreboda	The railway line between Stockholm and Gothenburg crosses the canal here. Töreboda also proudly presents Sweden's smallest ferry, "Lina", which travels back and forth across the Göta Canal.
09.00	The Berg Canal/ the Obelisk	An obelisk marks the highest point (91.5 meters above sea level) of the canal. This part of the canal is called the Berg Canal and originally had a sharp bend which was straightened in 1930-33.
10.00	Tåtorp	One of the canal's two hand-operated locks is found at Tåtorp.
10.00-12.15	Lake Viken	The beautiful Lake Viken (91.8 meters above sea level) serves as a water reservoir for the western section of the Göta Canal.
11.10-12.15	The Spetsnäs Canal/ Billströmmen	We steer through two narrow, wood-lined passages and small lakes full of water lilies.
12.15-12.30	Forsvik	Forsvik has a very interesting industrial history. The lock, built in 1813, is the oldest one in the canal. The impressive iron bridge dates from the same year. In the lock we are sometimes greeted with songs and flowers by the Kindbom family, a religious group. From here on we will be going downwards!
13.15	Karlsborg	Before our ship enters Lake Vättern, we pass Karlsborg and will be able to see the roof of the fortress, which was built in 1819-1909.

13.15-15.00	Lake Vättern	89 meters above sea level. Sweden's second largest lake.
15.00-18.00	Vadstena	Today Vadstena is an idyllic little town. It evolved around the 14th century convent of the Saint Bridget (St. Birgitta), becoming a spiritual, cultural and commercial center. The Abbey was built according to St. Bridget's plans, and was consecrated in 1430. The Castle was built in the 1540s by King Gustav Vasa. Local guides will meet us and take us with the sightseeing train to see the Abbey and the castle. You will also have time here to walk around the town on your own, or go for a swim in the lake.
19.15	Arr. Motala	It was Baltzar von Platen who drew up the plans for Motala, and today it is called "the Capital of the Göta Canal". In 1822 an engineering works, Motala Werkstad, was established here to serve the Göta Canal and is today considered to be the cradle of Swedish industry. Here you also find the head office of the Göta Canal Company, responsible for operation and maintenance. We visit the Motor Museum, with its large exhibition of antique cars and motorcycles in authentic surroundings, collection of radios, toys, household appliances and more. You can also walk to see Baltzar von Platen's grave, about 1 km along the left side of the canal. <i>Overnight stop.</i>

14.10	Berg (Heda)	We start our descent in the lock system of Berg (15 locks) towards Lake Roxen.

The convent of Vreta dates from about 1100 and was the first nunnery in Sweden. Its importance was later superseded by the convent founded by Saint Bridget (St. Birgitta) at Vadstena. The old convent church at Vreta is one of Sweden's most interesting, offering many medieval treasures. Today, it is used as a parish church and is therefore not always open to visitors. The tour guide will take

you on a walk (approx. 3 km) to see the church and the remains of the convent. As an alternative you can walk along the canal or take a swim in the warm water of Lake Roxen.

14.15	Mem	Passing through the last narrow lock before Slätbaken, an inlet of the Baltic, we leave the Göta Canal. On 26 th Sept. 1832, the Göta Canal was inaugurated at Mem amid great pomp and circumstance in the presence of King Karl XIV Johan and his family.
14.15-	The Baltic Sea	We cross open water for a short bit and then weave through the archipelago.
15.15-16.15	Stegeborg	The ruins of the Stegeborg Fortress are beautifully situated on a small island overlooking the bay of Slätbaken.
